About us

With its extended history of multiple solutions in the oil and gas field, **Magic Line** has successfully established itself as one of the most reliable and superlative Egyptian service providers in the North African region.

Founded in 1995, **Magic Line** is the fruit of Mr. Nagy Kamel Gendy's innovative idea to employ his deep and personal experience in providing full support to the companies operating in the oil and gas field. Invention, design, procurement, engineering and the application of various technologies are just some of the principles used in Magic Line's daily operations. The aim is simple; facilitate clients with all of the necessary means to operate their business efficiently and worry-free.

Magic Line also takes pride in the quality, competitive pricing, dedication and punctuality put into each project and stands devoted to breaking new grounds in all of the service applications relevant to the petroleum field industries.

Today, **Magic Line** boasts one of the richest track records and continues to gain the respect from some of the most prestigious International companies in the field.

Mission Statement

To remain focused on the future through continuous improvement in putting forward first-rate services and ensuring that complete customer satisfaction is attained at all times.

To ensure longevity of our company through the repeat and referral business that is achieved by customer satisfaction in all areas including timeliness, attention to detail, and service-minded attitudes.

To maintain highest levels of professionalism, integrity, honesty and fairness when conducting business with our suppliers, subcontractors, professional associates and customers.

To provide our employees with an honest and helpful working environment where every employee, individually and collectively, can dedicate themselves to providing our customers with exceptional workmanship, extraordinary service, and professional integrity.

Our Vision

To stand above competition and provide our clients with world-class services, quality products, and supreme customer support.

What We Do

Magic Line for Petroleum Services & Agencies offers a wide range of services with the purpose of providing time-saving and high-quality solutions. Magic Line for Petroleum Services & Agencies provides their services to various establishments in the region such as: oil & gas companies, public and private institutes, large corporations, military, federal and governmental institutions.

Petroleum Services:

- Steel Structure Manufacturing
- Field Joint Application
- Fiberglass Installation
- Rig Repair and Maintenance
- Site Preparation and Construction

Supplies:

- Uniform & Safety Equipment
- Carbon & Stainless Steel Fittings
- Manpower Supply & Certification Services

Agencies Partnerships:

- Galperti Group
- Company Services Swiss SA Group
- GEOSINTEX
- Gela Montaggi S.R.L.
- Alcinav S.P.A.
- Metec Group
- FRIGOMECCANICA GROUP
- SAMIA Italia Srl

Facility Management Services:

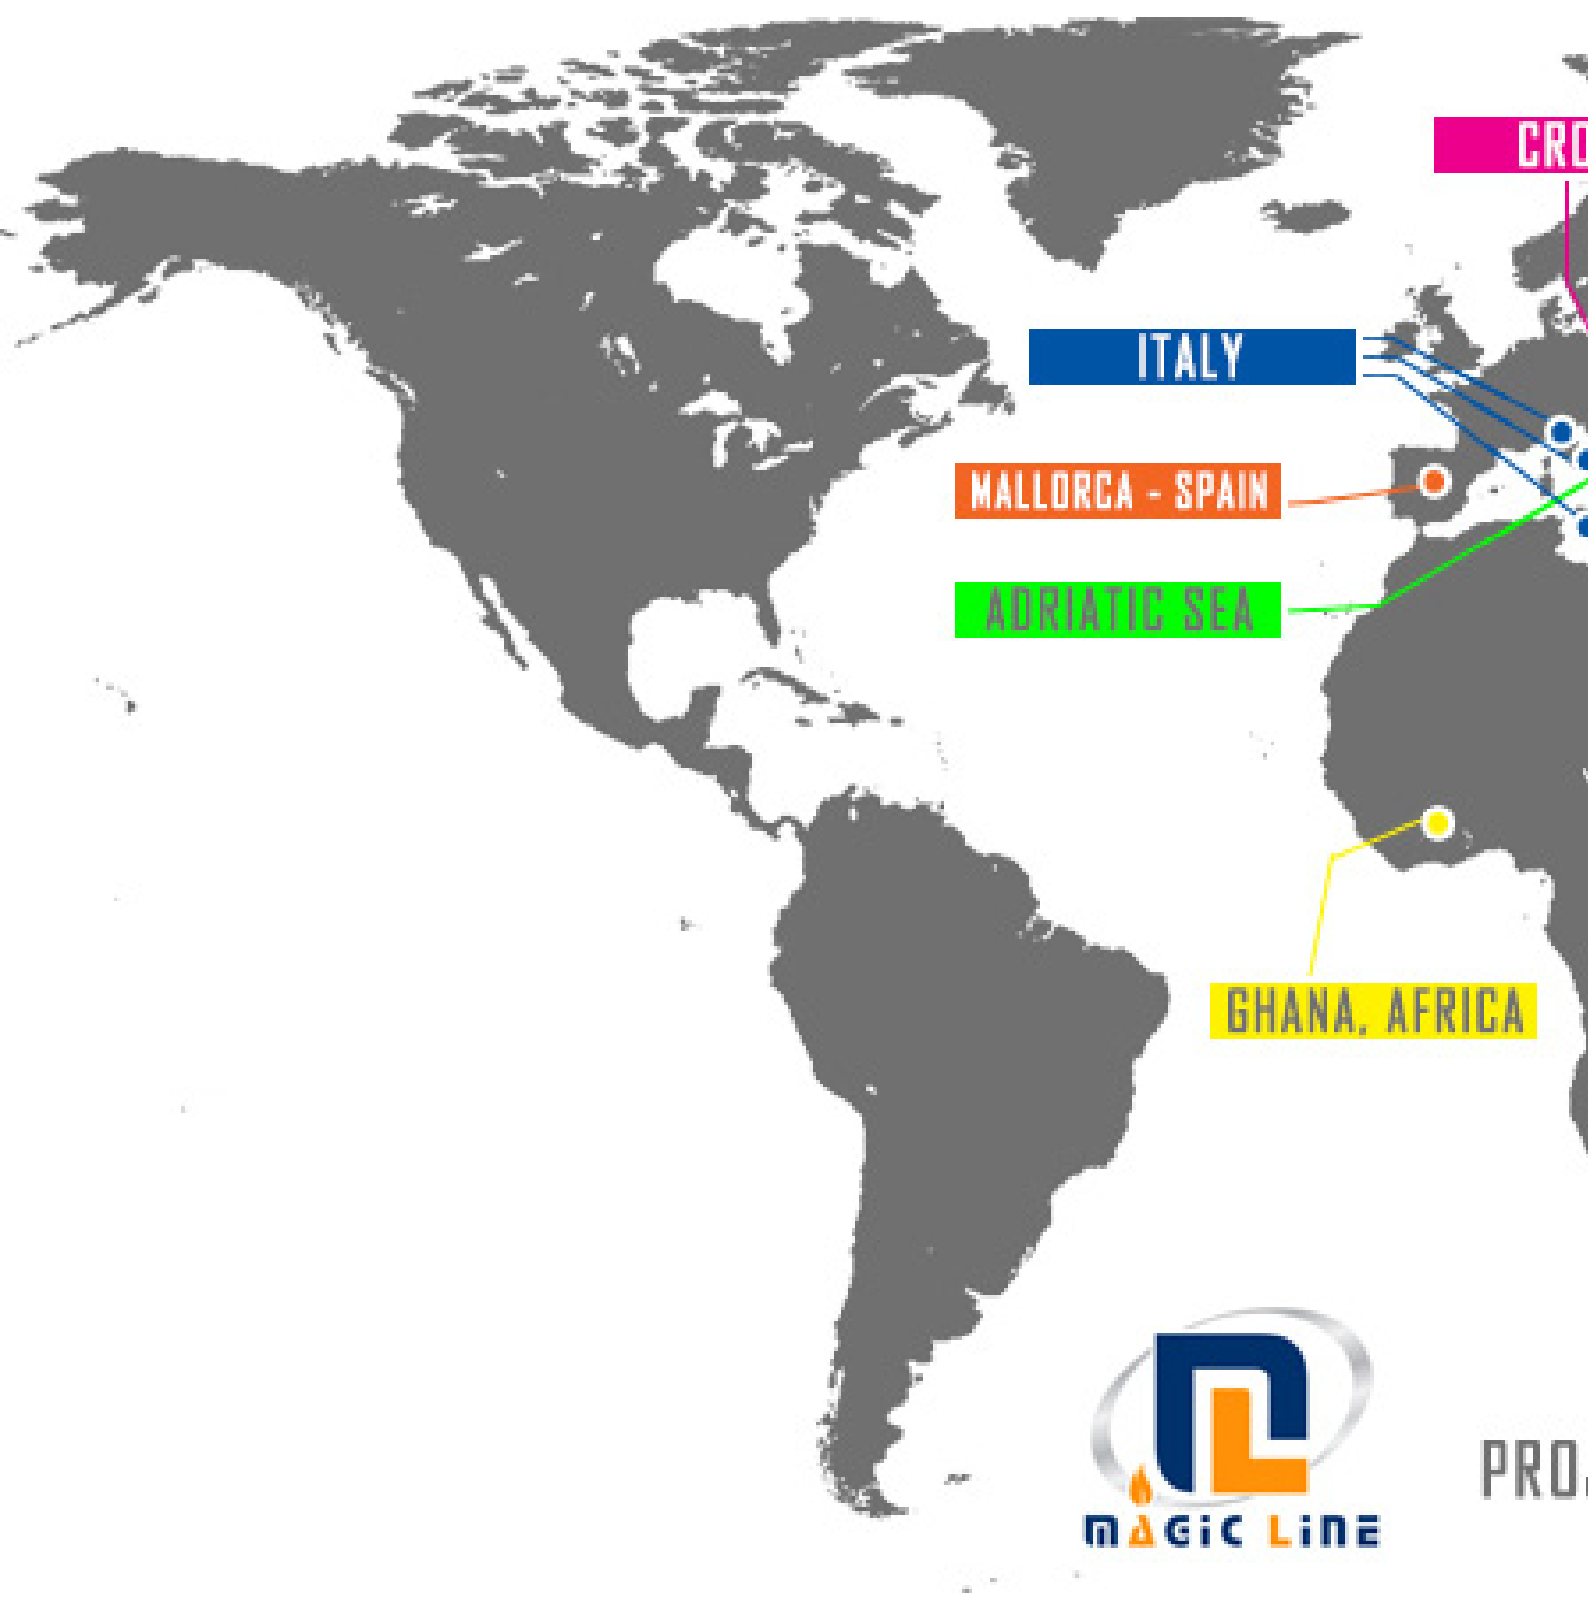

Technical Facility Management

- General Building Maintenance
- Engineering
- Manpower Supply

Infrastructural Facility Management

- Eco-Cleaning & HACCP Division
- Renovation and Relocation
- Catering and Buffet Services

Core Values

Core Values are at the heart of every business and Magic Line for Petroleum Services & Agencies takes it very seriously. In order to ensure that all of the responsibilities are met, all work carried out at and by Magic Line for Petroleum Services & Agencies is based on the company's philosophy and Core Values – which dictate the way in which the business is managed on day-to-day basis.

Health & Safety

Magic Line for Petroleum Services & Agencies' main focus comes in assuring the health and safety of the environment in which it operates in. We provide all of our employees with the training, knowledge and tools needed to sustain the health & safety of their working environment.

Customer Service & Satisfaction

Magic Line for Petroleum Services & Agencies is committed to provide maximum customer satisfaction with zero outfalls. Hence, our clients are our number one priority and exceeding their expectations is highly important.

Adherence to Deadlines & Deliverables

Magic Line for Petroleum Services & Agencies is committed to furnish the deliverables within the timeline and is dedicated to absolute transparency.

Social Responsibility

Magic Line for Petroleum Services & Agencies constantly aims to make a positive difference in the communities it operates in by the hiring and the development of local workforce and working with local supply chains for as much as it can. Magic Line is also committed for minimize the impact of its activities on the environment by conserving resources and reducing waste and emissions.

Integrity

Magic Line for Petroleum Services & Agencies aims to foster an environment where everyone involved makes their best effort to do the same. Active listening and seeking to understand all points of view are of a necessity.

Business Competitiveness

Magic Line for Petroleum Services & Agencies holds a competitive edge in the following areas:

1. Staffing of highly-experienced and efficient personnel, who have the superior knowledge and skills to support efficient operations in the field.
2. Using innovative modern practices which provide only the fastest and safest solutions for all of your business needs.
3. Maintaining a dedicative positive partnership with all of its clients.
4. Committing to superior customer service.

HSE policy

Magic Line HSE Policy Statement

Magic Line is the fruit of our employees' loyalty, commitment and hard-work, and their devotion to the business has been the sole reason for Magic Line's continual expansion and growth.

The employees are the most important aspect in the business and their safety is a priority and a non-negotiable target that Magic Line constantly adheres to. Therefore, Magic Line not only recognizes its moral and legal responsibilities in providing safe and healthy work conditions for the employees but also for all the contractors and customers alike.

Magic Line maintains its goal of delivering 100% customer satisfaction by providing training, offering full assistance, and ensuring that all of the relevant legislations and industry standards are followed.

While Magic Line ensures that appropriate training and understanding is incorporated in its daily operations, all of the employees – irrespective of their position – are encouraged to take reasonable care in ensuring that good health and safety procedures are implemented at all times.

In addition, all of Magic Line's employees and the relevant departments are required to assume personal responsibility for their own safety and for those of other work colleagues by always operating in a safe and appropriate manner.

It is Magic Line's duty and responsibility to comply with both the requirements and the spirit of the Health & Safety Regulations and in ensuring that its policy is brought to the attention of all employees during their induction.

Nagy Kamel
Chairman
Magic Line

Quality Policy

Magic Line is committed to provide the highest professional quality at all projects for the benefit of our clients; This is achieved through our established and effective quality assurance procedures and practices which are tailored as necessary to the expectations of our individual clients.

Quality is provided through the development and maintenance of our quality assurance system which is based on the requirements of ISO 9001:2008 Quality Management System and OHSAS 18001:2007 Occupational Health and Safety Management System. The extent and detail applied to individual projects will be either as agreed with individual clients or as determined by our Directors.

The Quality System is supported by the high level of commitment to quality in work for our clients by the management, staff, subcontractors and suppliers.

This statement is issued to reflect our commitment to quality in all facets of our operations.

Petroleum Services

Petroleum Services

Magic Line offers Petroleum Services and these services offered are aided by a staff of highly qualified and experienced personnel who are dedicated in providing nothing but a first-class service.

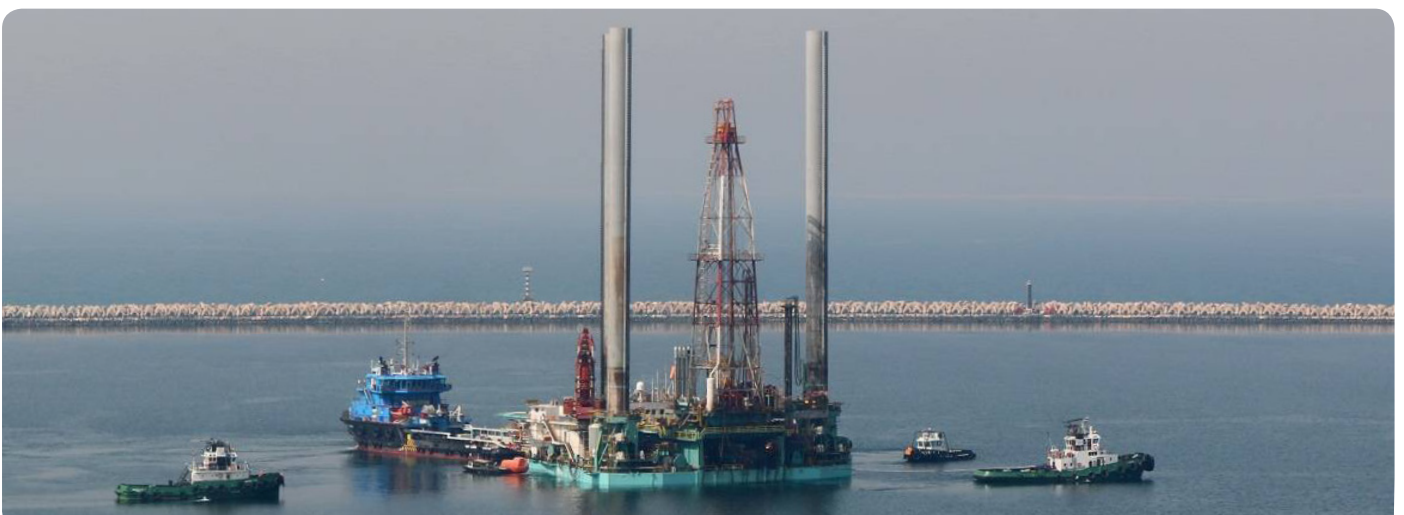

Meeting the demands and needs of the client is of the utmost priority for Magic Line and dedication to to a superior service, in order to guarantee a satisfactory result, is of a great necessity and an obligation that Magic Line is devoted to.

Our Petroleum Services include:

Steel Structure Manufacturing

Magic Line has established a specific department for the Steel Structure fabrication which goes through the clients' requirements and studies all of the possible solutions.

Rig Repair and Maintenance

Magic Line's profound experience in rig repair and maintenance contributes to our overall standing as the leading supplier in the Oil Service industry in the North African region.

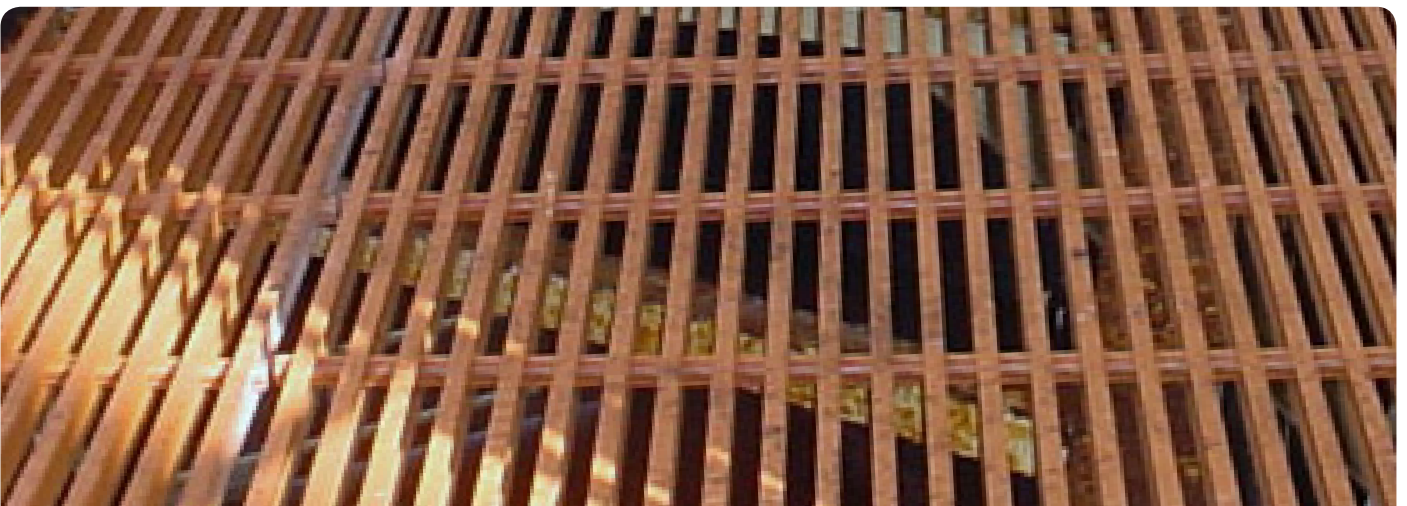

Field Joint Application

Magic Line provides certified coating products that minimize the effects of corrosion and abrasion which improve the longevity of costly equipment. Applications are carried out through a team of experienced coating technicians who have the required know-how to get the job done right, quickly, efficiently and safely.

Site Preparation and Construction

Magic Line for Petroleum Services & Agencies has been awarded a number of site preparations and construction projects, and has also been very lucky to work with many prestigious companies who have fundamentally put their trust in the hands of Magic Line.

Fiberglass Installation

Magic Line's extensive knowledge and experience in dealing with Fiberglass Grating-type projects makes it one of the most trustable, notable and reliable partners in the industry.

Steel Structure Manufacturing

Magic Line has established a specific department for the Steel Structure Manufacturing which goes through the clients' requirements and studies all of the possible solutions. A team of experienced engineers provide the designs and drawings by using the most sophisticated software programs in the industry and offer the client the freedom to choose a solution that will suit him both technically and financially.

Our team of skilled and experienced structural steel fabricators and certified welders and craftsmen go through various processes when approaching each project which include the assembling, fixing, cutting, beveling, drilling and welding that go hand in hand with the requested design specifications.

The entire process takes place in accordance with our Company's Quality Control system and HSE norms so that the required tests and processes are carried out with mere respect of the scheduled time dedicated to each project.

Gangway

Achieved in
2007

Client:
Saipem S.P.A

Year:2007

Description:
Galvanized steel gangway;coated with Epoxy
antirust

Dimensions:
Length: 21m (approx.)
Width: 1m
Height: 1m
Withstands: 750kg/m²

Industrial Uses:
Walkway, Stairway , Access Way, Loading
Docks, Manufacturing, Metals & Mining ,Oil
& Gas, Pharmaceutical, Power, Recreational,
Transportation

Completion Time:
Three Weeks

Trash basket

Achieved in
2006

Client:
SAIPEM S.P.A

Year:2006

Description:
Stainless Steel Trash Baskets; permanently equipped with a rubber seal and certified lifting slings; Steel thickness of 5mm

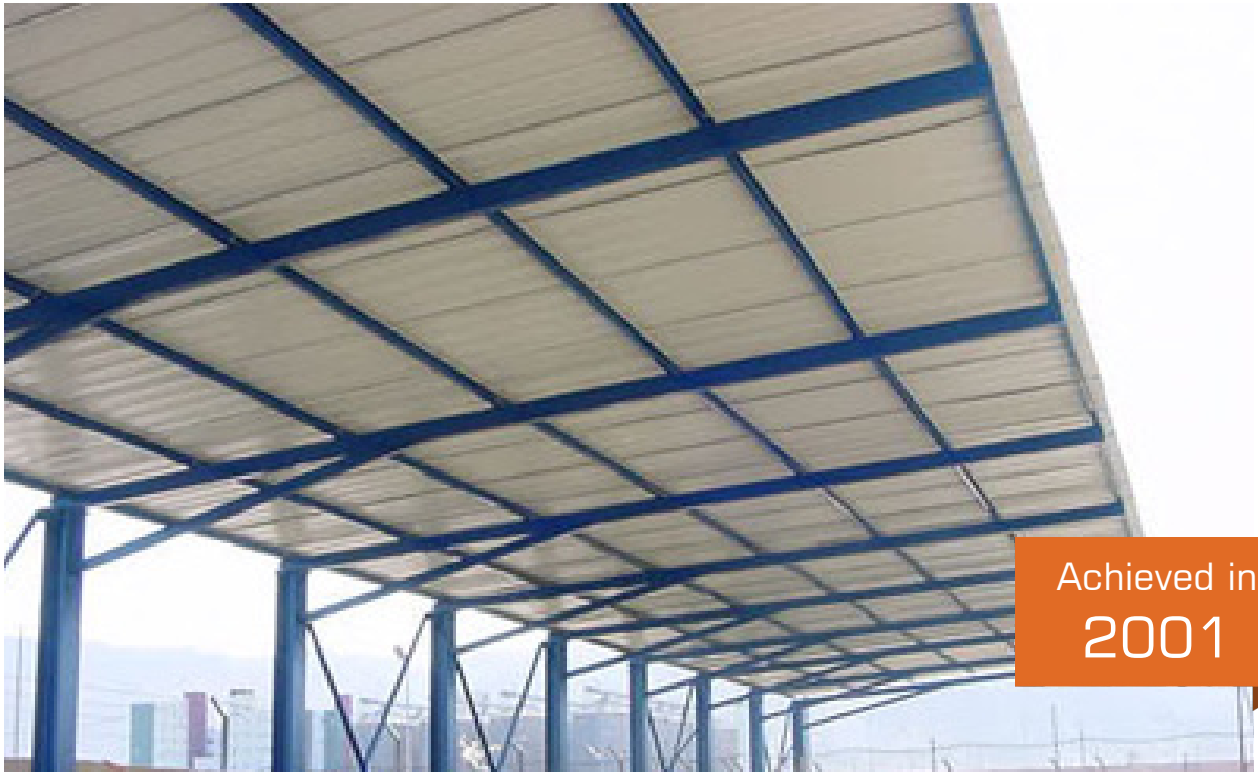

Dimensions:
Length : 2m
Width : 1.5m
Height : 1.3m
Capacity : 4 tons

Uses:
Storage of waste and used in the Architectural, Chemical, F&B, Manufacturing, Metals & Mining, Oil & Gas, Pharmaceutical, Recreational, Transportation, Water and Water Waste fields

Manufacturing Time:
Two Weeks

Shelter

Achieved in
2001

Client:
MPERSUB

Year:2001

Description:
A steel cover-shelter, designed and manufactured for a Parking Area; painted with an antirust coating

Dimensions:
Length : 15m
Height : 8m

Uses:
Shelter for sun-exposed areas; used by factories and any other open-area establishments.

Manufacturing Time:
Three Weeks

Portal Cabin

Client:
IMPERSUB

Year:2001

Description:
Portal accommodation caravan especially designed and constructed to serve the purpose of housing personnel. A total of 40 feet, includes two bedrooms and two bathrooms

Uses:
Personnel accommodation, open-area office space.

Manufacturing Time:
Three months

Shelves

Client:
Saipem S.P.A

Year:2007

Description:
Steel shelves used for storage of both light & heavy-duty materials.
Thickness : 3mm
Load Capacity : 500kg

Uses:
Storage shelves used in various industries

Manufacturing Time:
Two Weeks

Tanks

Achieved in
2009

Client:
AVA S.P.A

Year:2009

Description:
Manufacturing of the cement and barite steel tanks & silos.

Rig Repair and Maintenance

Magic Line's profound experience in rig repair and maintenance contributes to our overall standing as North Africa's leading supplier in the oil service industry.

Our staff which includes project managers, craftsmen, scaffold experts, welders, painters, carpenters, plumbers and riggers are fully qualified to carry out the necessary repairs or replacements of any damaged areas. All of the operations take place in the conformity of local laws and regulations, HSE norms and quality control management.

Repair of Saipem Land Rig 5863

Sand Blasting & Painting Work

Client:

Saipem (Portugal) Comercio Maritimo

Location: Abu Rudies PN 4

Year:2003

Description:

Sand blasting and painting work of the rig & rig's mast body base and the generator shelter, the drilling accessories and cable trays; Change of the drilling platform pipes routing, clutch platform and tanks by cutting and welding

Uses:

Mast Stairs are used to provide foothold, allowing easy access to the higher parts of themast than you can reach from the deck.

Saipem PN4 Mast Stairs

Achieved in
2004

Painting work of Mast Stars

Client:

Saipem (Portugal) Comercio Maritimo

Location: Red Sea

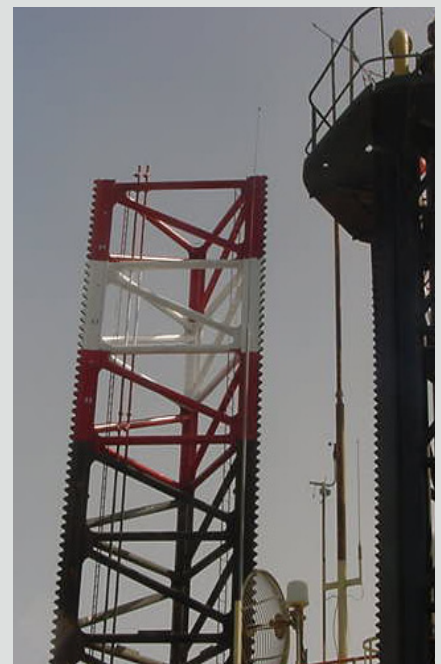

Year: 2004

Description:

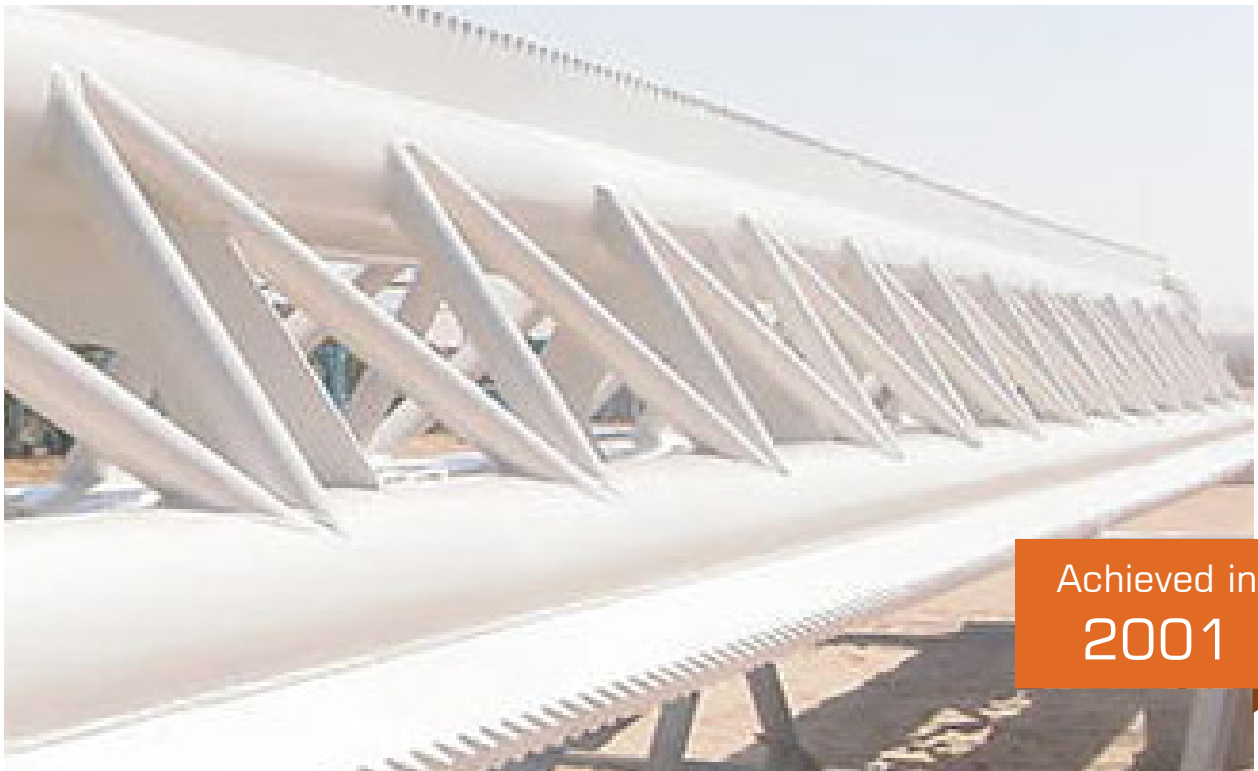

Painting work of the Mast Stairs

Project Duration:

Two Weeks

Repair of Water Tower PN4

Achieved in
2001

Client:
Saipem (Portugal) Comercio Maritimo

Year:2001

Description:
Complete repair work, through welding, painting and sandblasting of the sit to SA2

Painting of PN4 Heli-Deck

Achieved in
2003

Heli-Deck Paint Work

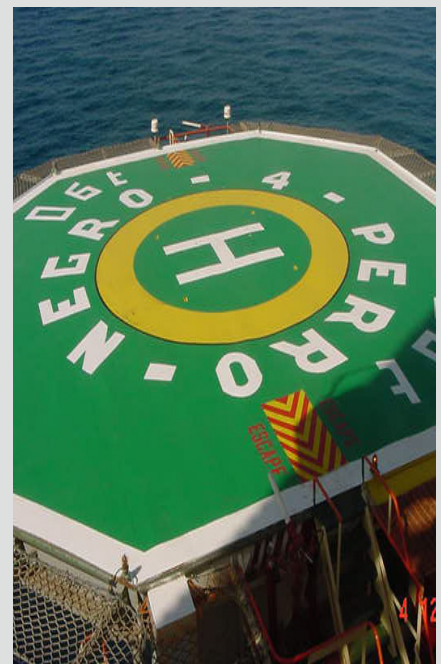

Client:

Saipem (Portugal) Comercio Maritimo

Year: 2003

Description:

Painting of Heli-Deck.

Mud Station Repair

Achieved in
2001

Client:
Baker Hughes

Location: Abu Rudeis

Year: 2001

Description:
Complete maintenance of the Mud Station; repair of the recycling station piping; soil tunnel rehabilitation; complete sand blasting and painting work.

Painting of the Mast Stairs

Client:
Saipem (Portugal) Comercio Maritimo

Year:2000

Description:
Painting work of the Mast Stairs

Fiberglass Grating Supply & Installation

Fibergrate was originally created and developed in response to the harsh conditions of chemical facilities which require products that can withstand corrosive chemicals, high temperatures, constant wash-downs and multiple impacts.

Designed to meet FDA and USDA criteria, Fibergrate's products have been engineered with slip-resistant and nonconductive properties whose key features are corrosive and slip resistant, flame resistant, impact absorbent, non-conductive, of high strength to weight properties and low maintenance, making these products ideal for all types of oil and gas facilities.

Magic Line's extensive knowledge and experience in dealing with Fiberglass Grating-type projects makes it one of the most trustable, notable and reliable partners in the industry.

With **Magic Line's** highly skilled and trained engineers who have a vast knowledge and practice in dealing with the materials, it can promise and guarantee satisfactory result for the job handed and assigned to its clients at all times.

Installation of the Fiberglass Grating onboard Perro Negro 4

Client:
Saipem

Location: Perro Negro 4

Year:2004

Description:
Supply and Installation of Fiberglass Grates; UV Coated

Field Joint Coating Application

Since 1998, Magic Line has met the rigorous demands of the oil and gas industry by providing highly efficient coats and performing the related application from offshore platforms to midstream pipelines.

Corrosion-related damages in the oil and gas production industry can be unquantifiable due to equipment failure and lost production time. Chemicals, water and sea salt have unavoidable effects on pipelines, fasteners and equipment. And industry-standard hot-dip galvanized, cadmium and zinc-plated coatings lack durability and deteriorate in tough offshore environments.

Magic Line provides certified coating products that minimize the effects of corrosion and abrasion and improve the longevity of costly equipment. Applications are carried out through a team of experienced coating technicians who have the required know-how to get the job done right, quickly, efficiently and safely.

NUR/BLY-11 32" & 18" Pipeline

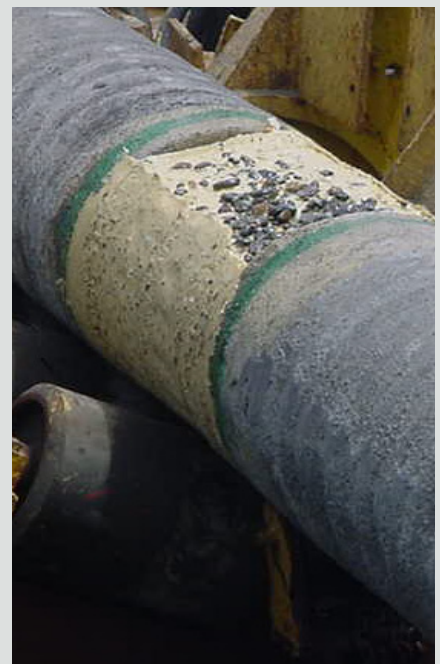

Client:
Petrobel

Location:.....

Year:2003

Description:
Field Joint coating of the Balaaym 19 sea line

PF5W-2 & 12" Akhen

Achieved in
2002

Client:
Petrojet/Petrobel

Location: Port Said

Year: 2002

Description:
Riser Pipeline Coating

Temsah Gas Development

Client:
Petrobel

Location:.....

Year: 2000

Description:
Field Joint Filling – Temsah 32» Pipelinee

Site Preparation and Construction

Over the years, Magic Line has been awarded a number of site preparations and construction projects. Magic Line has also been very lucky to work with many prestigious companies, who have fundamentally put their trust in the hands of Magic Line's project managers to get the job done.

The Basic Scope of Work includes the following:

1. Removal of all the scrubs
2. Rough leveling of the entire area

6. Allocating a proper storage space on the site's ground for all the necessary tools and materials

The basic site preparation also includes the assigning of the suitable office space, go downs, security booths and the personnel area as well as clearing the pathway, allowing the trucks and carts to move about freely around the site.

Impresub site preparation

Client:
Impresub International LTD

Location: Abu Rudeis

Year: 2001

Duration: 3 months

SERVICES PROVIDED

1. Preparing the site
2. Constructing a surrounding wall
3. Fabricating a shelter for the parking area
4. Manufacturing and supply of the portable cabins to serve as accommodation for Impresub personnel.

Rehabilitation of Saipem Base at Abu Rudeis

Client:

Saipem Spa

Location: Abu Rudeis

Year: 2005

Description:

The external plumbing net for sewage and fresh water: completely change of the corroded old net from the bathrooms to subbed and fresh water feed from the pump to the bathrooms and the garden. Make outside the building a subbed constructed from level 0 to level -3 with a reinforce concrete ceiling dimensions (3 x 3 mt) Electrical Works in the garden. Make a walkway and lighting columns 80 cm height with Decorative bricks in the garden

Duration:3 months

Services Provided

1. The external plumbing net for sewage and fresh water: completely change of the corroded old net from the bathrooms to subbed and fresh water feed from the pump to the bathrooms and the garden. Make outside the building a subbed constructed from level 0 to level -3 with a reinforce concrete ceiling dimensions (3 x 3 mt).
2. Electrical Works in the garden: Make a walkway and lighting columns 80 cm height with Decorative bricks in the garden.

Warehouse construction

Client:
Saipem

Location: Abu Rudeis

Year: 2006

SERVICES PROVIDED

1. Building Parameters:
Clear span two direction slop width (m) 10.00m out to out of steel line length (m) 30.00m out of out of steel line Eave Height (m) 7.5m.
2. Civil Works:
Soil preparation. Leveled, then hammered before and after lime stone installation I beam column base 16mm steel bar reinforced concrete dim. 70x70 cm with 70cm height Horizontal beam from base to another 16mm steel bar reinforced concrete dim. 30x30 cm with same length between the base.
3. Flooring:
12mm steel bar reinforced concrete 20 cm height 3.0x3.0 meter blocks, 2 cm foam in between grouting mortar for fine leveling and water insulation
4. Bricks: 3.0 meter height, four sides of building.
5. Steel Works: Building Skeletons , Standard BFI beam, vertical and shattering.
6. Roof Purlins: Light U (UPN) beam 18 2.5 meters separate.
7. Painting: 3 layer system primer and Alkyd.
8. Crane Systems:
Includes runway beams, columns brackets and crane stops include the crane system – manual type with 6 movement - and crane rails.

Amreya base civil work

Achieved in
2013

Client:
ieoc

Location: Amreya

Year:2013

Description:

- Repair and repaint the WC for security office.
- Final decision for workers room and WC.
- Revamp and repaint the main Gat of the base.
- Revamp the main entrance floor by concrete in and out.
- Make two layers of Asphalt «5 cm» inside.

Portrex – Port Said (Firefighting)

Achieved in
2015

Client:
IEOC

Year: 2014 - 2015

Description:
designing, installing and consulting of full Firefighting System
(civil and electro-mechanical works) with pumps and tanks.

Dimensions : 800 m

Loaction : PORTEX YARD in Portsaid (IEOC)

Supplies

Supplies

Magic Line's Supply Department is dedicated to fulfilling the client's exigencies for various materials and consumables. Magic Line is dedicated to provide only the products of high quality which are delivered in the shortest time and offered at a reasonable price; thus encouraging our clients in trusting us with the time saving solutions.

The range of supplies vary from procuring of the local to imported goods such as PPE, electrical, mechanical, hydraulic material, furniture & electrical appliances and many more.

Supplies Include:

Uniform & Safety Equipment

Magic Line offers an extensive variety of all types of Health & Safety equipment and a wide selection of staff uniforms which includes two-piece uniforms, overalls, other safety protective clothing, protective helmets, safety glasses, protective vests and many other industrial safety equipment. All of the items are available either for rent or purchase.

Carbon & Stainless Steel Fittings

Magic Line offers, as well, a wide range of all types of carbon & stainless steel fitting and these include elbows, tees, cops, flanges, reducers etc..

Manpower Supply & Certification Services

Magic Line offers its clients a professional recruitment service for the supply of personnel dedicated not only to the Oil & Gas sectors but also to cover the needs of other Industrial and Commercial organizations; Covering a wide range of fields, including technical services and various support disciplines such as; Project Managers, HSE Managers, Operation Managers as well as Civil Workers working in the Electrical, Structural and Mechanical Fields.

Manpower Supply & Employee Certification:

1. NDT inspectors (UT,RT,MT,PT,VY), ASNT level II certified
2. Welding inspectors (CWI Certified)
3. Painting inspectors (CSWIP Certified)
4. Mechanical, electrical, metallurgy & civil engineers

Special Services:

1. Q.C & NDT services
2. Specialized & Advance NDT Services
3. Soil and Concrete inspection services
4. Painting and coating inspection services
5. Equipment Rental
6. Supervision of offshore works
7. Supervision of diving works
8. Supervision of construction works
9. Inspection of Oil, Water and Gas flow-lines
10. Ditching including blasting, wrapping and ripping
11. Cathodic protection installation
12. Hydrostatic testing
13. Tanks and vessels

Agencies Partnerships

Magic Line's Agencies Partnerships

Magic Line's Agencies Department was created to carry out a deeper study of the petrochemical industrial needs in order to sort out and seek the best international procedures and materials that could best satisfy the Middle Eastern requirements.

After a considerable amount of hard work invested in the Department, Magic Line now boasts a record of working and representing some of the most respectable and reputable International firms that play a leading role in the Petroleum industry around the world.

Galperti Group

GALPERTI
GROUP
The Original

Galperti was founded in 1921 and the first products that were manufactured in the factory at Bellano were mainly small agricultural tool and components cast for the state railways.

Since then, development has continuously progressed and the advent of the chemical and petrochemical industries in the 1950's led to a diversification of production with the introduction of flanges and the termination of the original line of products.

GALPERTI ENGINEERING

- Valves
 - Ball Valve: Soft-Seated Valves / Metal-Seated Valves
 - Galperti Engineering trunnion-mounted valves
 - G-Blok Ball Valve Range
 - G-Blok Gate Valve Range
- Compact Flanges
 - GC Compact
- Hub Connectors
 - Clamps

GALPERTI FORGED PRODUCTS

Galperti Forged Products (GFP) is the new division of Officine Nicola Galperti e Figlio born to address the strong demand of special forged products required at international level from the oil and gas, petrochemical and extraction industries.

- Components for Field Development such as:
 - Wye
 - Bulk Heads
 - Reducers
 - Tees
 - Anchoring Flanges
- Components for PLEM/PLET/ILT such as:
 - Mis-alignment Flanges
 - Forged Rings
 - Forged Connectors
- Components for "Riser Systems" such as:
 - Tapered Joints
 - Coiled Tubing
 - Goosenecks
 - Pad Eyes
 - Hanger Spools
 - Riser Connectors
 - Forged Pipes
- Components for pipeline installation such as:
 - J-Lay Collars
 - CHOCs
 - Buckle Arrestors
 - Centralizers

Looking at Offshore Applications: GFP, integrating all of Galperti Group competences and capabilities, manufactures and assembles structures such as:

- Swivel Stacks
- Utility Swivels
- Chain Stoppers

As far as onshore based applications are concerned further to the manufacturing of thick walled forged pipes, GFP manufactures Monoblock Isolation Joints: G-joint. Monoblock Isolation Joints are used to electrically isolate pipeline and prevent corrosion via cathodic protection. Every G-joint is a unique product, specifically designed, manufactured and tested in Galperti facilities in accordance to Customer's specific request and international standards.

C.S.S.

Company Services Swiss is a leading Company in the industry that practices in the area of manufacturing Field Joint Coating & Infill materials for Off-shore pipelines. Serving as a subcontractor, supplier and a manufacturer for some of the major and biggest marine contractors, including; SAIPEM, ALLSES, NPCC, MICOPERI, LEIGHTON, J.RA - Field Pipe System operates worldwide with projects and operations located in the Mediterranean Sea, Africa, Middle & Far East and the Americas.

Company Services Swiss proactively cooperates with all of its clientele with the aim to gain quick & trouble-free laying rates and is dedicated to always maintaining a true Partnership-style relationship. Its core business values lie with the provision and production of Field Joint Coating & Infill Services and it aims to become the global leader in its industry.

C.S.S. – List of Products & Services

Field Pipe Systems' core business values lie with the provision and production of Field Joint Coating & Infill Services and it aims to become the global leader in its industry. Their products include the following:

List of Products:

1. Full-range of Solid PU's
2. Solid PU with Thermal Insulation Properties
3. Solid PU & Gravel Solution
4. Full-range of High Density PU Foams

List of Services:

Field Joint Coating Services

- a) Surface Preparation (Mechanical/Blasting)
- b) Installation of HSS of major manufacturers

GEOSINTEX

GEOSINTEX started operating in the field of geosynthetics in 1989 and thus gained a very long and important experience in marketing such products. It has a wide range of products that covers all the most important applications in the sector of geotechnical and hydraulic works. Technically wise, GEOSINTEX assists designers and customers choosing the most suitable materials for each application and gives a valid support for the design.

The large range of the represented products, along with their undoubted quality and commercial experience, made of GEOSINTEX a reference point for all the professionals involved in engineering works.

Since September 2004, the company entered a business management system, certified by DNV according to ISO 9001:2008 focusing on «Marketing of geosynthetics and related products and technical assistance»

GEOSINTEX is controlled by EDILFLOOR, manufacturer of geosynthetic materials since 1979.

Mission:

The purpose is to provide materials and technical assistance to any project in the field of civil engineering in order to achieve maximum reliability over time combined with the minor environmental impact.

Services:

1 - Technical Department

- Design in static and seismic field (internal, external and global stability)
- Drafting of construction documents from the preliminary to the executive stages
- Technical reports
- Technical support on work-site
- Geotechnical and hydraulic calculations
- Installation procedures
- Technical Seminars

2 - Areas of intervention

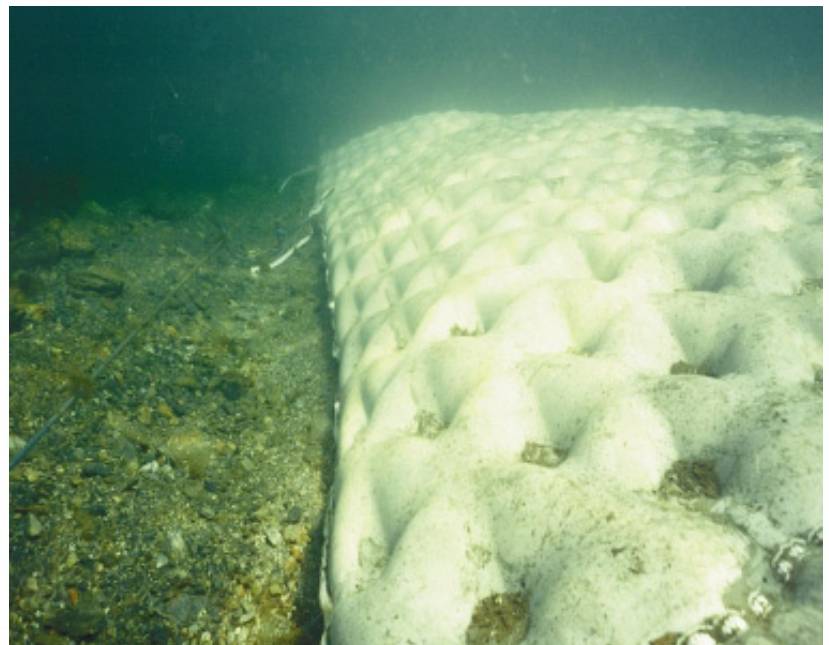

- | | |
|-------------------------|------------------------------|
| • Reinforced soil | • Rockfall barriers |
| • Slope erosion | • Special foundations |
| • Landfill | • Drainage system |
| • Asphalt reinforcement | • Accommodation watercourses |

List of products:

1. NONWOVEN GEOTEXTILES: Geodren
2. WOVEN GEOTEXTILES: Geodren W-PP / Geodren W-PES
3. GEOGRIDS: Edilgrid
4. ASPHALT GEOGRIDS: Asphaglass
5. DRAINAGE GEONETS AND GEOCOMPOSITES: SintexDrain / NewDrain
6. GEOMATS AND BIOMATS: SintexMat
7. MATTRESSES AND BAGS: SintexMattress
8. GABIONS: Filter Unit
9. GEOTEXTILE TUBES: SintexTube

Products' application fields:

- Pipeline protection
- Erosion control
- Temporary jetty
- Dewatering
- Geomembrane protection
- Separation and filtration layer
- Scour protection
- Land reclamation
- Coastal defence
- Soil stabilization and reinforcement
- Drainage layer
- Barrier layer (lining application)

GELA MONTAGGI S.R.L.

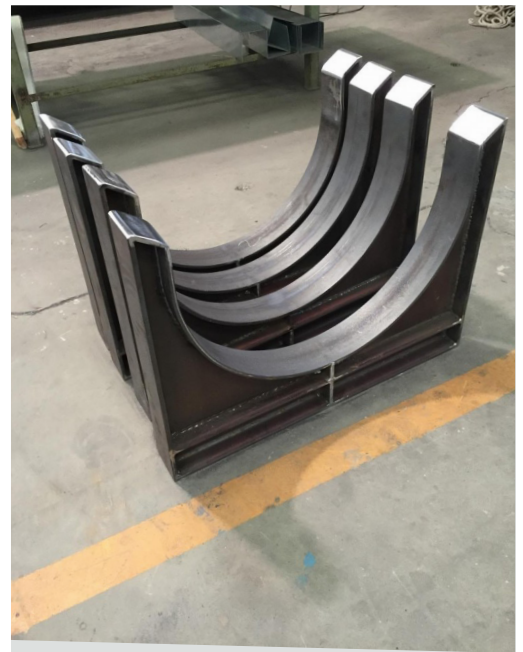

GELA MONTAGGI S.R.L.
Montaggi Industriali

The company was founded in 1986 and it's specialized in the following activities:

- Manufacture and assembly of industrial installations, offshore rig, equipment
- Maintenance activities on offshore business
- Supply of equipment for offshore business
- EPC (Engineering Procurement & Construction)
- Pipe lay on shore

List of Products for the services:

- King Size Rat Hole Stands
- Saipem TAD – Generic
- Heating Gas
- Smoking & Meeting Room Refurbishment
- Bop Trolley
- Lifting tool
- Boat Landing
- Saipem TAD – Design
- Pipe Line – Gagliano
- Fresh Water Line replacement
- Mockup Cabin Assembly
- Ventilation Line
- Sliding Hatches & Sliding Doors
- Accumulator Rack
- Pipe Line – Ragusa
- Wet Unit Assembly
- Driller Cabin Door
- Belly Board
- Moon Pool Platform
- Life Boat Replacement
- Various Supplies
- Sliding door kit

Alcinav S.P.A.

ALCINAV SRL is the new chapter of a long story that started from Fratelli Signani, founded almost a century ago, and through Alcinav srl which realized many prestigious naval furnishing.

Thanks to skilled workforce and newest technologies, Alcinav Srl is a reference for internal and external market supplies.

The current 4000sqm plant has been redesigned in order to allow quicker Time to Market and may produce more than 500.000 sqm of panels each year.

Alcinav is a producer of naval components and furniture and the fields of interest are as follows:

- Offshore
- Yacht
- Marine
- Naval

List of Products:

- Light alloy and B15 Doors
- Hinged single door, Yacht Line mod
- Wall panels
- False ceiling
- Inspection Hatches
- Honeycomb and steel furniture
- Prefabricated wet units
- Accessories for wet areas
- Special components

Metec Group

METEC GROUP, established in 2006, is the result of the collaboration among three companies: Metec srl, Wilson Walton International Srl and Metec West Africa Ltd.

This group was conceived to further strengthen the close collaboration between Metec srl and Wilson Walton International srl, two skill and successful companies which are present in the cathodic protection market as international leaders for offshore and onshore systems.

Wilson Walton long experience in design and engineering has joined to Metec competitiveness and quality technology operating as a synergy with a unique sales point in engineering, production, start-up/installation and maintenance stages of cathodic protection and antifouling systems.

Products & Services

Metec Italia and Metec West Africa provide a wide range of cathodic protection solutions for offshore structures that can be preserved by sacrificial anodes: bracelet anodes for sub-sea pipes and jacket anodes for platforms, both cast in aluminum alloy, as like as flush-mounted anodes suitable for any other offshore application.

A consolidated experience drives a skilled team in all activities, both in design as in casting and in quality control.

This know-how is incorporated in all standard products, but, moreover, gives its best results in analysis, engineering, production and testing of customized anodes, we can realize to maximize protection of a new structure or retrofit an existing one accommodating all required specifications.

Products offered for Marine field:

- ICCP
- Antifouling system
- Chlorematic - Eletrochlorination
- Oval anodes
- Drop anodes

Products offered for Marine field:

- Bracelet bolted anodes
- Bracelet welded anodes
- Jacket anodes
- Flush mounted anodes

Products offered for Industrial/Onshore field:

- Transformer/Rectifiers
- Silicon Iron Anodes
- Telecontrol system

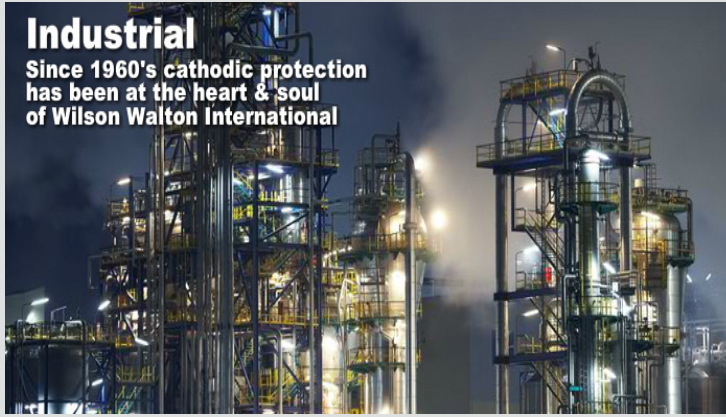

- Ti/Pt Anodes & MMO Ti Anodes
- Magnesium anode with backfill
- Reference cell

Products offered for Industrial/Onshore field:

- Structural anodes
- ICCP

Industrial

Since 1960's cathodic protection has been at the heart & soul of Wilson Walton International

Offshore

A wide range of cathodic protection solutions for offshore structure.

Marine

Design, supply, start-up & after-sales assistance of cathodic protection solutions.

Port/Harbour

Structural anodes, different for shapes, sizes, insert type and alloys.

FRIGOMECCANICA GROUP

Industrial refrigeration since 1970

Founded in 1970, Frigomeccanica Group draws on the experience of over forty years in the market of air conditioning, heating and cooling process.

From design to scheduled maintenance

The company is qualified on design, installation, modification, extension and maintenance of technological systems of all kinds.

Cutting-edge technology

Taking advantage of highly skilled staff and modern media, Frigomeccanica Group identifies and provides solutions for different types of intervention at any level, taking care of all aspects of executive and organizational and offering a high standard of quality.

Integrated quality-environment-safety policy

On obtaining UNI EN ISO 14001:2004 and OHSAS 18001:2007 certification in 2012 Frigomeccanica Group s.r.l. decided to draw up a single integrated policy covering all the established principles and objectives regarding quality, environment and safety.

Sectors involved in:

1. Realization cooling central in the hospital sector
2. Offshore HVAC, Oil & Gas sector refrigeration
3. HVAC systems and retrofit refrigerant gases from refineries
4. Air conditioning and heating in civil and commercial

Maintenance air conditioning and refrigeration industry;

1. Expertise and experience in the maintenance of air conditioning
2. Availability of operators
3. Control and constant monitoring

SAMIA S.R.L

Subsequent to the discovery of large gas fields in Northern Italy in 1951, Mr. Antonio Ventola establishes the Brand Samia®, trading in Combustion Equipment and Flare Ignition Systems. In a few years Samia® starts its proprietary designed production line, installing also a R & D Centre for testing and development of Flares and Combustion Equipment, becoming in the early 60's the very first European based Company engineering Complete Flare Systems. The Brand led to great success, penetrating European, North African and Middle East/Gulf Markets, spreading into India in the late 80's, China ten years later and, most recently, Russia.

Antonio Ventola in the recent times Samia® Registered Trade Mark, Technology and the entire Clients portfolio went under the whole control of Samia®Italia Srl, operating the Flaring Business under traditional Brand Logo and the Burners Business with the new «Burning Passion» symbol. From its new location in the most organized commercial area in Merate, one of the best business, historical and tourist areas in between Milano, Bergamo, Lecco and Como; Samia® Italia moves with renovated enthusiasm, modern re-organization and well motivated partners towards another half a Century of success under the guidance of the second Ventola generation.

SAMIA – List of Products, Provision Sectors & Services

Products

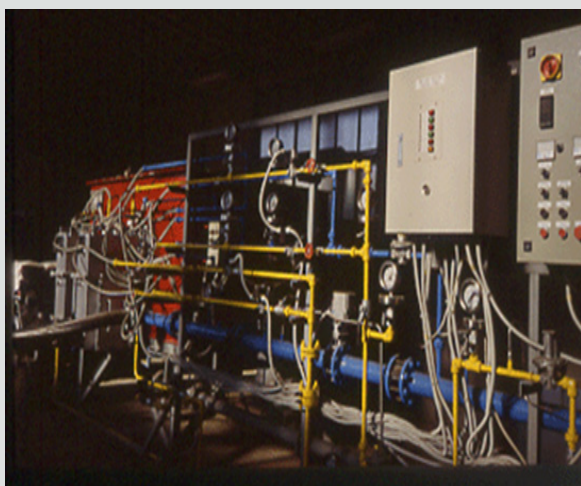

1. BURNERS: Conventional, loNOx, Forced and Natural Draft.
2. REGENERATIVE COMBUSTION: Conventional and HRS High-cycle Regenerative combustion System (an NFK of Japan Technology).
3. FLARES: Elevated and Horizontal (Burn Pit), Offshore, Steel, Special Units, Biogas.
4. ACCESSORIES: Valves, Hoses, Pilots, Ignition Systems, Fittings, Flanges, Blowers, Vessels (K.O. Drums & Water Seals), Prefabricated Piping.

Provision sectors

1. Process Burners
2. Industrial Burners
3. Flare and Flaring System
4. Management Control Systems

Services

1. Safety and automatic control.
2. Surveys, feasibility studies and drone aerial inspection for flares
3. Spare parts
4. Revamping / repairs
5. Erection supervision
6. Start up support

Facility Management Services

Facility Management Services

Magic Line offers Facility Management Services and these services offered are aided by a staff of highly qualified and experienced personnel who are dedicated in providing nothing but a first-class service.

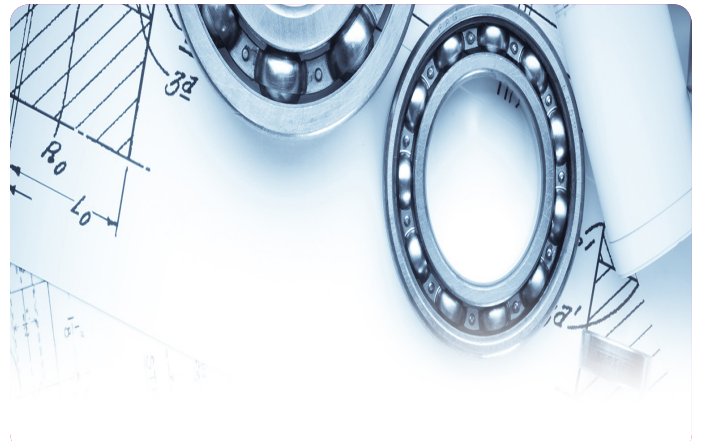

Meeting the demands and needs of the client is of the utmost priority for Magic Line and dedication to a superior service, in order to guarantee a satisfactory result, is of a great necessity and an obligation that Magic Line is devoted to.

Magic Line offers two types of services within Facility Management; Technical Facility Management and Infrastructural Facility Management.

Within Technical Facility Management:

General Building Maintenance

Engineering

Manpower Supply

Infrastructural Facility Management:

Eco-Cleaning & HACCP Division

Catering and Buffet Services

Renovation and Relocation

General Building Maintenance

Magic Line focuses its maintenance of buildings in the following areas of work; Inspection and Maintenance & Repairs.

Within Maintenance & Repairs, we concentrate on A/C & Central A/C maintenance, Firefighting maintenance and development, Electrical & Electromechanical, Plumbing, Carpentry & Glass Work, Painting, Flooring, and Internal Lining Work.

A/C & Central A/C maintenance includes:

- Installation
- A/C general repairs
- Filter cleaning
- Freon refill/recharge
- Checking of the Freon cooling levels
- Checking for any Freon leaks
- Checking of the compress amp draw
- Belt adjustments
- Pressures and temperatures
- Checking for any AC drain blockage

Firefighting maintenance and development includes:

- Designing
- Installing
- Consulting of full Firefighting System (civil and electro-mechanical works) with pumps and tanks

Engineering

Magic Line stresses its attention on Engineering as well in the following areas of work; Steel Structure Manufacturing and Site Preparation & Construction.

Steel Structure Manufacturing includes:

- Assembling
- Fixing
- Cutting
- Beveling
- Drilling & Welding

Examples of work done:

Gangway – Trash Basket – Shelter – Portal Cabin – Shelves – Tanks – Customized Spare Parts

Site Preparation & Construction includes:

- Removal of all the scrubs
- Rough leveling of the entire area
- Filling the holes with sand or rammed earth
- Establishing permanent and suitable benchmarks
- Laying out of the trench lines
- Allocating a proper storage space on the site's ground for all the necessary tools and materials

Manpower Supply

Magic Line offers and supplies manpower; Manpower recruiting inside and outside of Egypt covering a wide range of fields in Oil & Gas sector / Industrial & Commercial organizations.

- Grade A: Managers - Superintendent - Engineers - Supervisors
